

Advantis

Gives your well a voice you can hear anywhere...

OVERVIEW

Complete Solution

The Advantis System streamlines the flow of information from the field to the office and provides an end-to-end solution for your oil and gas well automation needs; minimal equipment, customized data gathering and reporting, integrated communications and world-wide coverage.

Cost Effective

Because it interfaces with existing chart recorders and EFM's, no additional costly equipment or upgrades are necessary for automation, keeping costs low.

Fast Install

Installs within hours and immediately provides real-time information when and where its needed, no matter the well location.
